

PORT ADELAIDE ENVIRONMENT FORUM

THURSDAY JUNE 15TH 2017

7PM - 9PM

COMMUNITY ENERGY

As our energy systems transform, *community energy* can contribute to more equitable, efficient and resilient energy systems.

Community energy projects can occur through donations, investments and bulk buys, to share the profits of renewable energy projects more broadly, unlock projects that wouldn't otherwise occur and help us all rethink our energy system. Heather Smith, who will address the Forum, is a renewable energy consultant and investigated *community energy* in USA, Europe and Japan during her 2016 Churchill Fellowship.

Port Adelaide Enfield Council Town Hall

34 Nile St, Port Adelaide

Free event. All Welcome

No bookings required.
